DucoPlus 45 is a “controllable” aluminium glazed-in window ventilator featuring a smoothly-curved canopy for superior weatherability and positive action inner ‘tip’ which directs the flow of incoming air upwards.

- » 45 mm glass reduction only and thermally broken.
- » Graduated operation for greater control.
- » Positive action inner ‘tip’.

Technical Specifications

Airflow at 1 Pa	7,2 l/s/m
Airflow at 2 Pa	37 m ³ /h/m
Equivalent Area at 1 Pa	9162 mm ² /m
Free air per 1000mm	15000 mm ²
Wind and water tightness (in closed position)	wind: 600 Pa / water: 900 Pa
Stiffness and strength	Up to 600 Pa
Glass reduction	45 mm
Glass thicknesses	24,28 and 32 mm
Vent height	60 mm
Sound reduction, Dne, W (C;Ctr)	25,0 dB (0;1) 44,0 dB (-1;-2)
U value	1,84 W/m ² K

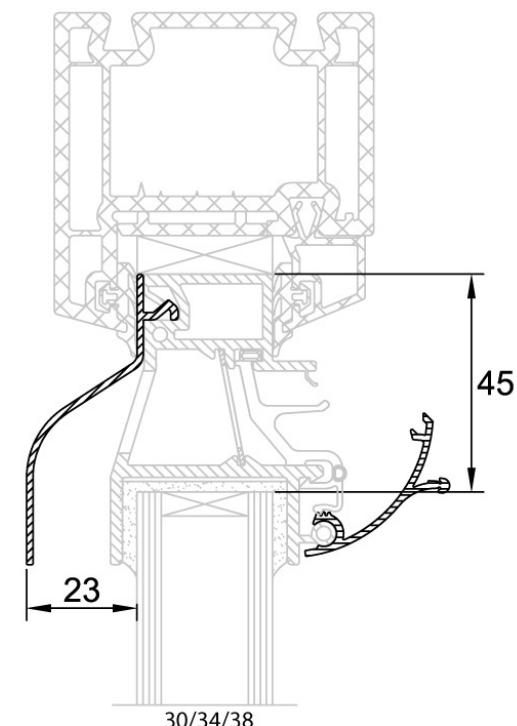

DucoPlus 45

DucoPlus 45

Minimum glass reduction

DucoPlus 45 on UPVC frame

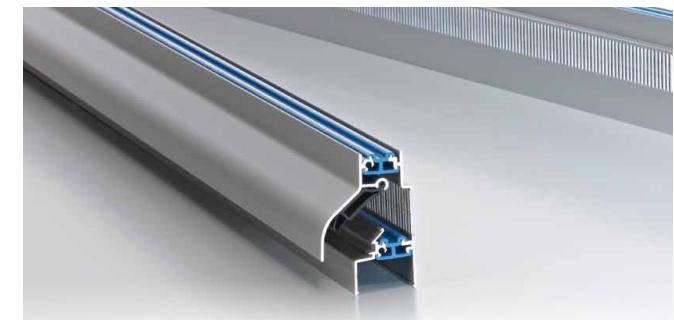

DucoPlus 60 is a “controllable” and thermally broken aluminium glazed-in window ventilator featuring a smooth external design with an internal “air deflector” directing the incoming air upwards, thus avoiding draughts.

- » Minimum glass reduction, maximum air throughput.
- » Good acoustic performance.
- » Authentic Duco Softline-Design.

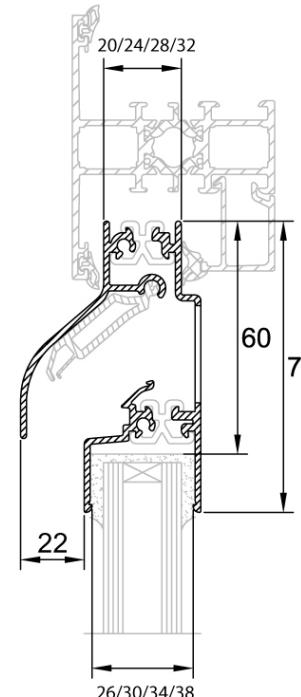

Technical Specifications

Airflow at 1 Pa	13,5 l/s/m
Airflow at 2 Pa	70 m ³ /h/m
Equivalent Area at 1 Pa	17179 mm ² /m
Free air per 1000mm	15000 mm ²
Wind and water tightness (in closed position)	Up to 650 Pa
Stiffness and strength	Up to 1430 Pa
Glass reduction	60 mm
Glass thicknesses	20,24,28 and 32 mm
Vent height	75 mm
Sound reduction, Dne, W (C;Ctr)	in open position 27,0 dB (0;0) in closed position 45,0 dB (-1;-1)
U value	4,02 W/m ² K

DucoPlus 60

DucoPlus 60 on UPVC frame

DucoPlus 60 Compact vent

DucoFlat 80 series vents provide a completely flat appearance and have been specifically engineered for integration in the fixed and sliding panes of a sliding window or a sliding door.

- » Completely flat vent.
- » Suitable for installation in the sliding panes of a sliding window or sliding door.
- » Suitable for installation in the fixed panes of a sliding window or sliding door.

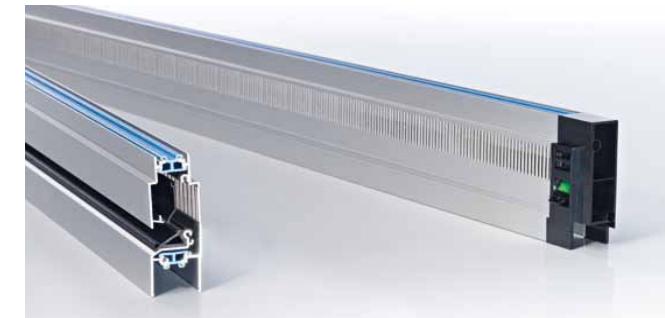

Technical Specifications

Airflow at 1 Pa	11,55 l/s/m
Airflow at 2 Pa	59 m ³ /h/m
Equivalent Area at 1 Pa	146697 mm ² /m
Free air per 1000mm	15000 mm ²
Wind and water tightness (in closed position)	wind: 650 Pa / water: 200 Pa
Stiffness and strength	Up to 1600 Pa
Glass reduction	80 mm
Glass thicknesses	24,28 and 32 mm
Vent height	95 mm
Sound reduction, Dne, W (C;Ctr)	27,0 dB (0;-1)
in open position	27,0 dB (0;-1)
in closed position	44,0 dB (0;-1)
U value	3 W/m ² K

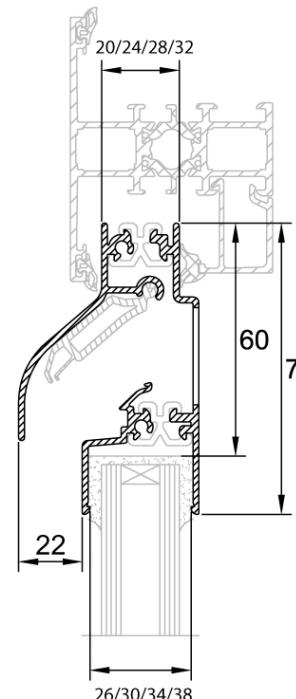

DucoFlat 80 'SR'

DucoFlat 80 'SR'

Completely flat vent

DucoFlat 80 on UPVC

DucoStrip is a high quality aluminium 'through the frame' slot ventilators. The combination of the smooth design and integrated endcaps and high quality polyester powder coating makes DucoStrip the preferred choice for any type of window frames.

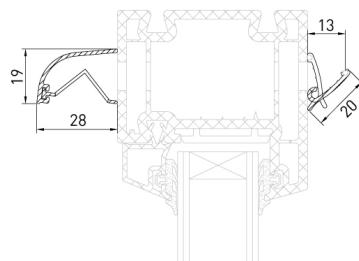

- » Smooth & Slim with minimum protrusion » Fitting screws concealed by smooth end caps
- » Directs flow of incoming air upwards » O-ring seal provides highest rating of weather tightness: 900 Pa

Equivalent Area

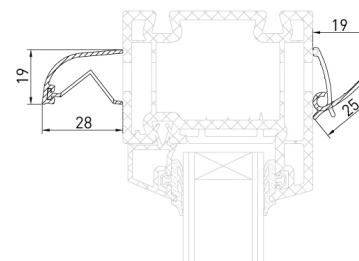

Vent length (mm)	Slot height (mm)	Equivalent area (mm ²)
340	10	2838
450	10	3868
290	12	2545
370	12	3385
230	16	2481
290	16	3359
360	16	4034
410	16	4579
460	16	5663
680	16	8348

Characteristics

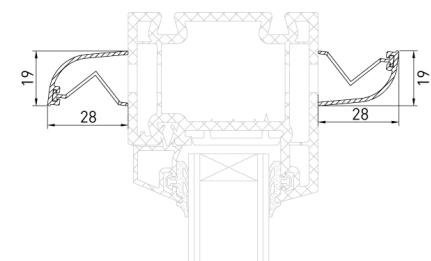

- » Material: aluminium: Al Mg Si 0,5 to DIN 1748, part 1
- » Finishes: polyester powder coating (60µ): UV colourfast, anodised (20µ)
- » End caps: white or black
- » Screws: stainless steel A2 Philips screws 3,5 x 9 mm DIN 7891
- » DucoStrip Controllable vents
- » DucoStrip Permanent vents

Canopy & 'slimline' stripvent

Canopy & 'wideline' stripvent
(for slot widths 14 to 16 mm)

Canopy & canopy
(for slot widths 12 to 16 mm)

DucoStrip

Aluminium slot ventilators

Sitting on top of the window frame, the vent is almost invisible. It does not interfere with the designed U value of the complete window. The integrity of the window frame and glazing is untouched. The Ducotop sits on top of any style of window frame, UPVC, aluminium or timber. From 50 to 190 mm in depth, and creates no visual distraction to the window. It removes the fitting of a vent from the window manufacturing process. The self regulating vent equalizes the airflow thus avoiding uncomfortable draughts. The DucoTop range is further enhanced by the addition of the DucoTop 60 AK, the standard acoustic version, and for locations with higher noise levels, the DucoTop 60AK Plus is the answer !

Technical Specifications

Sound reduction, Dne, W (C;Ctr)	in open position	up to 27.0 dB (0;0)
	in closed position	41.0 dB (0;-1)
Water tightness (in the closed panel) + Wind tightness (in closed position)	650 Pa	
Glass reduction	n/a	
Vent height	60 mm	
Fitting height	65 mm	
U value	1,85 W/m ² K	

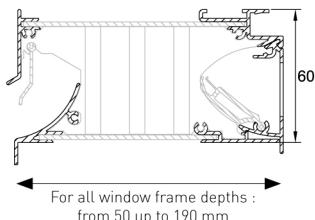

DucoTop 60 'SR'

DucoTop 60 'SR' Invisible fitting

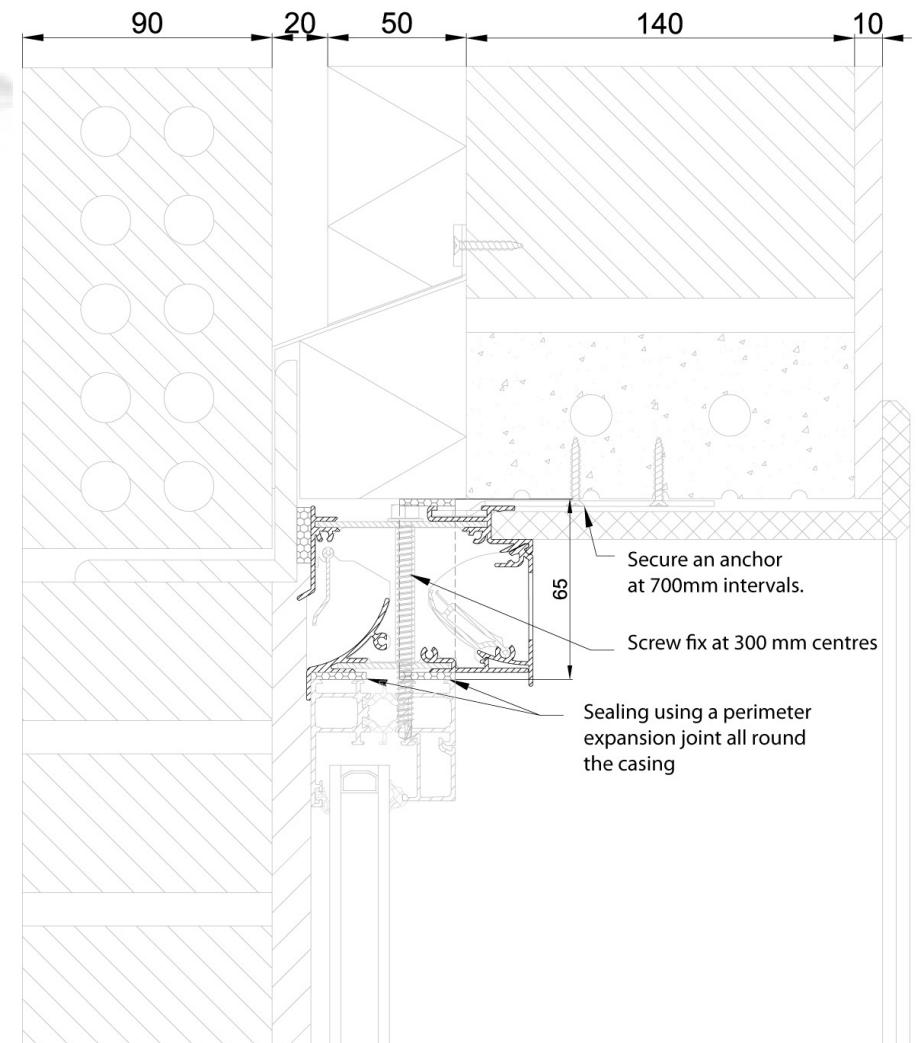

Quick and easy installation

The window vent comes as a complete unit. The top is transparent and accommodates pre-drilled, glass-fibre reinforced joining elements. The top mounted self-anchoring channel ensures a quick and strong fixing to the adjacent walls. All movable parts are easy to replace.

Optional The end caps can be finished to any RAL colour

GlasMax 'SR' is an acoustic and thermally broken vent engineered for installation on glazing. The acoustic air inlet is exceptionally suitable for low-level noise disturbance; can achieve up 34 dB.

- » Vent with sound absorbing infill made from sustainable materials.
- » The sound absorbing material filters the air inflow, thereby reducing airborne irritants.
- » Suited to high-rise applications.
- » Three different air flow rates.

Technical Specifications

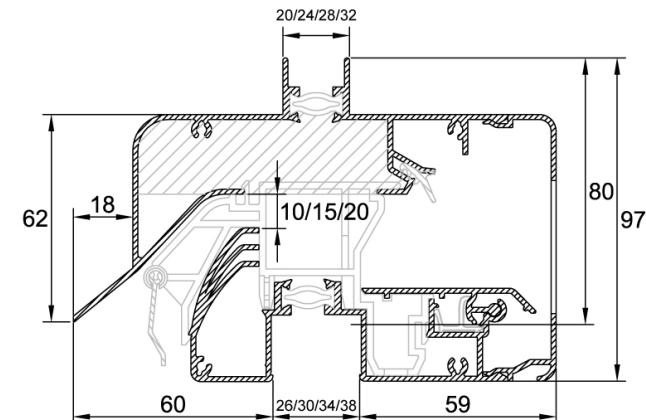

Water tightness (in closed position)	1050 Pa
Wind tightness (in closed position)	600 Pa
Glass reduction	80 mm
Glazing thickness	20/24/28/32 mm

GlasMax 'SR'

GlasMax 'SR' 'Acoustic ventilator'

GlasMax 'SR' Transform mounting

GlasMax 'SR' Compact transom mounting

DucoMax 'SR' is a self regulating, acoustic vent (sound attenuating ventilator), specifically engineered for situations exposed to high levels of noise disturbance. The various types are attractively designed and offer excellent acoustic and airflow performance. The external profile is available in three different versions.

- » Three types of external profile : BudgetLine, SoftLine and LamelLine.
- » Four fitting depths : Corto (small), Medio (medium), Alto (large), Largo (extra large).
- » Suited to situations giving rise to high levels of noise disturbance.
- » Mounts on any type of installation.

Technical Specifications

Water tightness (in closed position)	1050 Pa
Wind tightness (in closed position)	600 Pa
Strength and rigidity	Meets the highest standard
